DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Savage USPN 6699211. Savage discloses an implant for draining chamber water from the front eye chamber into one or more episcleral veins consisting of one tubular part 34, a guide wire (Figures 4; col. 10, lines 50-57). The limitations directed to piercing the vein and withdrawing the wire are directed to an intended use of the article. "It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations." *Ex parte Masham*, 2 USPQ2d 1647 (1987). The article consists of several tubular parts 36, a plate 40, having diameters in the claimed range (col. 5, lines 45-58; col. 12, lines 36-52); and one or more eyelets 42. The article is made of inert silicone materials (col. 12, lines 64-67).
